DEFINITIONS

*Variable A:	Count of new students that accepted offer of admission and are expected to attend the first day of class. <u>Do not</u> include students who did not accept the placement offer or provided formal notice of withdrawal before the first nursing course began.
**Variable B:	Count of new students actually enrolled and present for first nursing class. For many, variable A and B will be the same.
***Variable E:	Count of all nursing students – new and continuing.
****Variable F:	<p>If the program does not have a method for calculating retention/persistence rate, use this formula: number of first-year or first term students completing all required courses for the year/term divided by total number of new students admitted to program in the year. <u>Do not</u> include students re-taking nursing courses or entering as advanced placement students in the first year.</p> <p>Note: If the program uses a calculation of students graduating within a specified time period, provide that figure. This variable does not need to reflect the persistence of reported student group from variable A.</p>
